Research Experience

Predoctoral Fellow (2012 – Present)

Center for Neural Technology (CNT), University of Washington

Work within [CNT's Neuroethics Thrust](#)—under Dr. Sara Goering—to promote ethics engagement in neural engineering. Attend and participate in lab meetings, organized outreach events, conducted surveys, and co-authored articles for internal distribution and publication.

Graduate Research Assistant (2014 – 2019)

BioRobotics Lab, University of Washington

Investigated the moral implications of Brain Computer Interface-triggered Deep Brain Stimulation (BCI-DBS). Explored the potential psychosocial changes DBS users could experience when they have BCI control over their neurostimulators, and evaluated how do/ought accounts of autonomy, identity, and agency track those changes.
