SCIENCE, TECHNOLOGY & SOCIETY STUDIES CERTIFICATE PROGRAM

The primary goal of STSS, as a domain of scholarship, is to understand the jointly intellectual, material and social enterprises of science and technology in all their complexity. Nothing could be more urgent or more consequential at this juncture!

The Science, Technology, & Society Studies Certificate Program at the University of Washington offers graduate students an opportunity to pursue a richly interdisciplinary graduate study in Science, Technology, and Society studies. Its core faculty, drawn from across campus, jointly teach an introductory core course, provide Certificate students one-on-one advising, and oversee a portfolio capstone experience.

For the details of the STSS Certificate Program, see the STSS homepage at: http://depts.washington.edu/stsst/
For campus activities related to STSS, see the Science Studies Network at: http://depts.washington.edu/ssnet/
