

Representative Areas of Study and Sample Acceptable Courses

All courses besides PHILVS 511-512 taken for the Certificate in Values in Society must be approved by a student's faculty advisor, including courses on this list. While the courses on this list are in general acceptable, students must okay their particular study program with their faculty advisors. This list is not comprehensive. Courses that do not appear on the list below may still be acceptable. The list provided below is a sampling of courses available at the U.W. that can be a part of a cohesive program of study in ethics. Additionally, a course's eligibility to count toward the certificate also depends on whether it is required by your home department. For more info, see the U.W.'s [guidelines for graduate certificate program proposals](#). If you can suggest a course that would be of interest to students in the Program, please let us know at ponvins@u.washington.edu. Readings courses and courses taken S/NS are never acceptable.

Animal Welfare

BIOL 476—Conservation Biology

BIOL 477/ENVIR 477—Marine Conservation

ESRM 458—Management of Endangered, Threatened, and Sensitive Species

PHIL 415—Advanced Topics in Animal Welfare

Bioethics and Medicine
